COMPANY PROFILE

PT MEGUMI SHAKA GLOBAL

Jl. Siti BKKBN, Kel. Mustikajaya, Mustikajaya, Kota Bekasi, Provinsi Jawa Barat - 17158

02182597133 info@migumishakaglobal.com

VISION

Become a Company that is capable in Quality and Service as well as Competitive in Price, by prioritizing the empowerment of local community resources through increase the capacity and quality human resources.

MISSION

Provide the best Service and
Choice of Customer demand.
Provide Solutions and Education to problem faced by Customers.
Qualified, Innovative, Professional, Punctual and Communicative.

OUR PROJECT

ANDON SYSTEM

Installation | Programming | Repair

2K, 3K SYSTEM

ASSEMBLY DEVICE

Filling device | Vacuum device
Leveling device | Adhesive device
Coating device | Mixing device
Leak tester | Mounting device
Transfer device

OTHER

Temperature control | Filtering unit

FABRICATION WORK

Constant flow-rate coater for high viscosity fluids

(Snake type-pump)

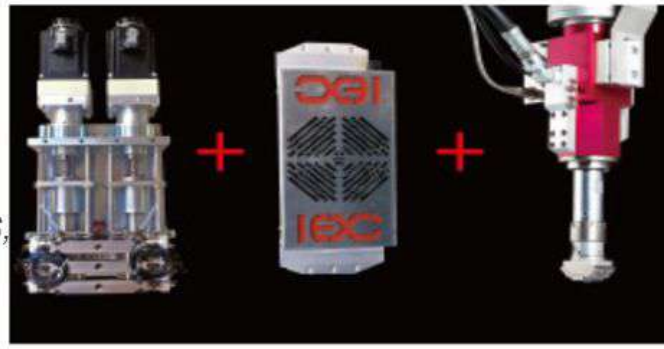

A snake-type pump manufactured by Graco Inc. makes its appearance at last! This pump enables the even coating of beads by accurate and steady discharge control. A range of materials such as low to medium viscosity fluids and high viscosity sealants can be used for this pump, realizing discharge at a constant flow-rate.

Compact high-viscosity tandem booster pump

(Peltiertype temperature control unit) plus new TRIAS

A booster pump with tandem specifications is now here! Conventional material filling time is no longer necessary and continuous application is possible. By incorporating a Peltier type temperature control unit with the new TRIAS that can circulate materials, we propose the latest material temperature control system requiring no temperature control water

New hybrid dispenser

(Air operating method)

With a remote control system, we have upgraded the material pressure regulator of the hybrid dispenser, which proved extremely popular last year! Pressure can be regulated from outside, improving operability.
